

Perpetual Robot

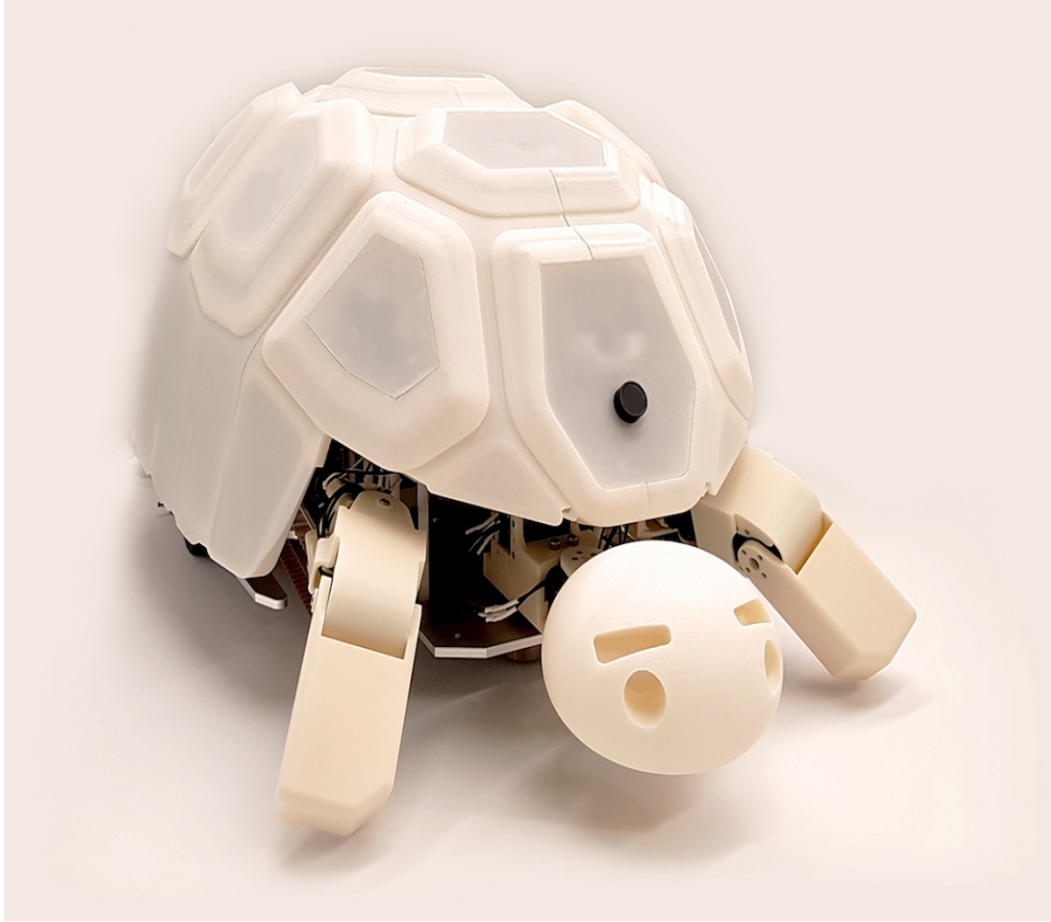

We are living a smart world. Nowadays Robot is a smart things in all over the world. Everything can do a smart Robot.

Perpetual Robot is a robot which can do perpetual work. It can response our selective response and selective touch.

Some kind of perpetual robot are animal robot such as fish robot. It can move in the water easily without any problem. No one can call it a robot because it looks original robot.

It's a small robot. Many of the time it use for competition. We all are can play with this robot. It can be use many robotics program. Such as robotics competition, robot fight, robot soccer. All this robot never use for any other normal work. It

mainly use for research in many official place and competition. Mainly we can say that perpetual robot is very important robot for our research world and robotics competition. This might be our smart future of Perpetual Robot.
